
SUBJECT: SERVER REFRESH PROJECT

1. Background

FTB's current compute core servers have reached their respective maximum use milestones and the bank seeks to replace them.

On that note, the bank is desirous, to engage a competent technical consultant firm, to guide it through this process, i.e. from sizing, development of specifications & proposition of a suitable solution.

2. Terms of Reference

The firm shall in consideration of the task at hand, be required to;

a) Deliverables;

The firm will be expected to;

- i. Review the bank's current infrastructure, vis-a-vi its expansion & scalability plan(s), and come up with a clear sizing plan for the new required compute infrastructure.
- ii. Develop a comprehensive compute server(s) specification that addresses the bank's expansion strategy, including adaptability for diverse workloads and environments while delivering world-class performance, and ensuring that all components are taken care of.
- iii. Advise on suitable solution propositions in compliance with the specifications above.

b) Competence;

The firm should meet the below conditions;

- i. Provide evidence of or references and recommendation letters from reputation organizations for such previously undertaken works
- ii. Provide manufacturer authorization and partner level certificates (these will be verified with the manufacturer)
- iii. Provide proof of atleast 5(five) years existence in the market and dealing enterprise solutions sales, integrations and support.

- iv. Provide proof of atleast 3(three) previous supplies of the same nature with each value of atleast USD. 50,000
- v. Must have a team of certified experts in the enterprise solutions field who can ably support in case of need
- vi. Provide realistic delivery timelines
