# Introduction

The Finance Trust Bank (FTB) Pillar 3 Market disclosures follow the requirements set forth by Bank of Uganda, about the rules on risk and capital management in financial institutions and which represented a significant advance in the governance of financial institutions.

The objectives of supervising the Basel II requirements are: (i) promote the security and soundness of the Financial System, (ii) maintain capital at appropriate levels, (iii) improve the competitiveness conditions of the financial market, and (iv) establish a more comprehensive approach to risks. The Basel III requirements are based on a "three pillar" structure: (1) "Minimum capital required", (2) "Supervisory Review" and (3), "Market discipline", allowing public access to key information related to the capital adequacy of financial institutions in a structured and standardized manner.

Finance Trust Bank affirms its commitment to transparency in all its activities, in compliance with the requirements of regulatory bodies.

## **Scope of document**

In accordance with the requirements, we present the information regarding risk management, the calculation of the amount of risk-weighted assets (RWA), and the calculation of the Reference Equity.
